ProLong N

ProLong N is a nitrogen stabilizer that protects against volatilization, denitrification and leaching

ProLong N nitrogen stabilizer is supplied as a 35.5% active ingredient solution of dicyandiamide (DCD). **Derived from:** DCD: a nitrification inhibitor and N-(n-butyl) thiophosphorictriamide (NBPT): a urease inhibitor

HAZARD STATEMENT

DANGER

- May cause an allergic skin reaction
- Causes serious eye irritation
- May damage fertility or the unborn child
- Exposure may aggravate pre-existing eye, skin, or respiratory conditions.

PREVENTION

- Obtain special instructions before use.
- Do not handle until all safety precautions have been read and understood.
- Avoid breathing vapors, mist, or spray.
- Wash hands, forearms, and other exposed areas thoroughly after handling.
- Wear protective gloves, protective clothing, and eye protection
- Contaminated work clothing must not be allowed out of the workplace.
- Wash contaminated clothing before reuse

DIRECTIONS FOR USE

- Rates should be based on the length of time you want to protect your nitrogen from denitrification, leaching and volatilization.
 - 1.35 to 2.7 gallons PER TON of 32% UAN applied per acre
 - 1.12 to 2.25 gallons PER TON of 20% Liquid Urea applied per acre
- Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop adviser, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.
