CONFORM DP

Deposition and Drift Suppression Agent, Spreader, Penetrant

Conform DP is a tank mix adjuvant formulated to provide optimal pesticide spray performance by enhancing deposition of the spray application.

Conform DP contains Quantum™ Technology, an innovative adjuvant technology that has an affinity for pesticide active ingredients.

Conform DP suppresses off-target drift of spray applications by providing a more uniform pattern and velocity of the spray droplets.

Conform DP can be used with air assist and conventional spray nozzles.

Conform DP can be used with herbicides, including desiccants, insecticides, fungicides and plant-growth regulators, in keeping with pesticide label recommendations.

Conform DP maximizes pesticide performance by improving spray coverage and through enhanced retention and infiltration of the targeted leaf surface.

Always read and follow all label directions, mixing instructions and precautionary statements of the herbicide being applied. AMS Premium Blend Max may be used with applications labeled for agricultural, industrial, non-cropland and other uses where the herbicide label suggests, recommends or requires the use of ammonium sulfate and nonionic surfactant. Not recommended for use with herbicides that do not suggest the use of AMS.

100% Polyoxyethylene sorbitan fatty acid ester, soybean oil ethoxylate, copolymer of alpha- and beta-pinene.

Available in
2 x 2.5 gallon jugs
& 30 gallon drum.

Use Rate		
	Rate of Conform DP per Acre (A)	Gallons of Spray Solution per Acre (GPA)
For Drift Suppression:	4 to 6 fl. oz./A 7 to 10 fl. oz./A 10 fl. oz./A	5 to 15 GPA 16 to 50 GPA Greater than 50 GPA
For Spray Deposition Enhancement For Use With Insecticides and Fungicides as a Spray Deposition Agent:	2 to 4 fl. oz./A	5 to 25 GPA

Notice: Many factors affect off-target movement of herbicides such as spray height, nozzle configuration, spray pressure, temperature, wind and thermal inversions. Always follow herbicide label directions to minimize spray drift. Conform DP will not eliminate off-target movement.

WA Reg. No. 39303

CONFORM DP

Q: What is Conform DP?

A: Conform DP is proprietary blend of oil based adjuvants formulated to add in the deposition of pesticide applications.

Q: How does Conform DP work to reduce spray drift?

A: Conform DP reduces the amount of fine particles generated in the spray pattern by keeping more of the spray droplets within the most effective size range and by increasing the canopy penetration of the pesticides being used.

Q: Does Conform DP affect the pattern of the application?

A: No. While Conform DP is effective at low rates, it does not negatively affect spray patterns like polymer based drift additives can.

Q: Does Conform DP replace oil based adjuvants such as crop oils and MSOs?

A: No. These products should continue to be used at the recommended rates found on their labels.

Q: Does Conform DP eliminate all possible drift from a pesticide application?

A: No. Many factors can affect the potential for drift, including wind speed, humidity, temperature and the possibility of an inversion. Conform DP is a tool that can help manage and improve an application, however, all of these factors need to be considered before the decision to make an application is made.
